

POLICIES

REC's management team aims to build a sustainable competitive advantage over the competition, having for this purpose developed and integrated a Quality Management System, based on its methodologies.

The system aims to ensure:

- Meet the needs and exceed the expectations of clients, through the effective application of the Quality Management System (QMS);
- Continuously seek quality improvements, aiming to meet and exceed legal, statutory, regulatory and good engineering practice requirements;
- Promote an environment for the operationalization of activities that allow employees to develop their skills, creativity and motivation for the benefit of our clients;
- Continuously improve and maintain the QMS, through awareness raising, training and participation of all employees;
- Periodically review the QMS to continuously improve its effectiveness, efficiency and the satisfaction of the parties;
- Consider suppliers as business partners.
